

Marking Rubric – OOP244 Project, Summer 2017

(Weight: 20% of term mark)

On time submission of milestones 1, 2, 3,4, and 5:	20% (4% each)
--	---------------

On time submission of milestone 6 (fully assembled project):	20%
--	-----

1. <i>Total possible for on time submission:</i>	40%
---	------------

2. Properly working code:	30%
----------------------------------	------------

If the submitted program is deemed not to be properly working, or has hard-coded sections inserted by you in order to pass the submission tests, your professor may require a revision and re-submission of your project. Your project will not receive any marks other than marks earned for on-time submission until you have submitted a properly working project.

3. Well-formatted code, with proper indentation to show logical structure, and consistent spacing	10%
--	------------

4. Proper use of C++ constructs and statements:	10%
--	------------

5. OO Modular design, implementing single entry – single exit, high cohesion, and low coupling, utilizing encapsulation, inheritance, and polymorphism where appropriate	5%
---	-----------

6. Comments where appropriate:	5%
---------------------------------------	-----------

Total:	100%
---------------	-------------
